STFP

Make a 3 to 5% (3 to 10%) diluted solution of the detergent and add to a foam cleaning system.

Pressurize the foam sprayer and spray onto

Leave for at least 5 minutes then scrub with a brush or scourer.

Rinse thoroughly with tap water then drain dry.

#### **GLORIA Pressure Sprayer FoamMaster FM 10**

(Product code: 989201)

A compact, pressurized foam sprayer that can be used one-handed.

No need for an air compressor or compressed air piping.

#### The foam even adheres to vertical surfaces.

\*Photograph shows stainless steel sheet during spraying.

#### **Precautions for Use**

- Only use for intended applications.
- Do not mix with other chemicals or cleaning agents.
- Do not combine with other products or materials. Avoid mixing with acidic products, drain cleaners, table vinegar, alcohol, food waste, etc. Mixing with these materials may generate harmful chlorine gas.
- Do not use with boiling water.
- Do not use with brushes made from animal hair as this may generate gases.
- Do not use on products made from aluminum, copper alloy, brass, iron, untreated wood, bamboo, tin, etc.
- Avoid using on lacquer ware.
- Avoid using the undiluted product on tile grout (may cause discoloration), varnish, paint, zinc plating, other painted or treated surfaces, or fluororesin coatings that have been damaged by oil or heat (may cause peeling). May cause corrosion depending on the material. First test a diluted solution of the product in an inconspicuous area for potential discoloration before using over a wider area.
- Always read the "Instructions for Use" and "Precautions for Use" printed on the product container before use.
