Not a Non-Medical
Deleterious Substance

The Only Foaming Cleaner

SaniPlan

Commercial Use

Foaming Disinfecting Detergent for food processing plants

Foaming Senjozai CL

Use to clean and disinfect conveyor systems,
behind food processing equipment, floors, and walls.

20 kg

Features

Developed as a foaming cleaner: produces a fine foam

Produces a fine and robust foam with a long-acting effect on dirt and microbes, even on vertical surfaces. Maximizes cleaning and disinfecting performance*.

*Does not eliminate all germs.

Effective against food-based dirt and grime

Breaks down and removes mixed grime composed of proteins and oils. Also effective against grime from vegetables.

Product Name	SaniPlan Foaming Senjozai CL 20 K
Packaging	20 kg (plastic container)
Product Dimensions	185 mm × 355 mm × 390 mm
Product Code	235501
JAN Code	4975657410266

Ingredients Label, etc.

Acidity/Alkalinity
Ingredients

Alkali
Alkaline agents (sodium hydroxide, potassium hydroxide)
Sodium hypochlorite
Surfactants (alkylamine oxides)

Listed dimensions are design values for width × depth × height.
The appearance and labeling of this product may be altered without notice.

Foam Cleaning (3 to 5%)

Diluting the Product 1

Add product to a foam cleaning system so it produces a 3% to 5% detergent spray.

Use the foam cleaning system to spray the detergent solution onto the surface/object.

2

Leave for a period of time before scrubbing with a brush or scourer.

3

Rinse thoroughly with running water.

Soaking (1 to 10%)

Diluting the Product 1

Create a 1% to 10% dilution of the product in a soaking container.

Immerse the object in the dilution and leave to soak.

2

Remove the object after about an hour and scrub with a brush.

3

Rinse thoroughly with running water.

Foam cleaning system **SaniPlan Foam Sprayer N**

(Product code: 901196)

Lightweight, easy to carry,
and simple to operate.
Generates a fine foam.

Precautions for Use

- Only use for the applications shown.
- Do not mix with other chemicals or cleaning agents.
- **Do not combine with other products. Avoid mixing with acidic products, drain cleaners, table vinegar, alcohol, food trash, etc. Mixing with these materials may generate harmful chlorine gas.**
- **Do not use with hot water.**
- Do not use with brushes made from animal hair as this may generate gases.
- Do not use on products made from aluminum, copper alloys, brass, iron, untreated wood, bamboo, tin, etc.
- Avoid using on lacquer ware.
- Avoid using the undiluted product on tile grout (may cause discoloration), varnish, paint, zinc plating, other painted or treated surfaces, or fluororesin coatings that have been damaged by oil or heat (may cause peeling). May cause corrosion depending on the material. First test a diluted solution of the product in an inconspicuous area for potential discoloration before using over a wider area.
- Always read the "Instructions for Use" and "Precautions for Use" printed on the product before use.
