# Foam Cleaning with Minimal Odor

SaniPlan Commercial Use Foaming Disinfecting Detergent for food processing plants

## Foaming Senjozai

Use to clean and disinfect food processing equipment, floors, and walls. Not chlorine-based for minimal odor.

20 kg

## **Features**

## **Developed as a foaming cleaner:** produces a fine foam

Produces a fine and robust foam with a long-acting effect on dirt and microbes, even on vertical surfaces. Maximizes cleaning and disinfecting performance\*. \*Does not eliminate all germs.

#### No chlorine smell

More worker-friendly when sprayed over wide areas such as floors or walls.

## **Recommended for processing rooms** and distribution warehouses

Effective at removing stubborn tire marks from the floor as well as oil and grease. Perfect for the floors of processing rooms and distribution warehouses.

\*May not remove all tire marks depending on the type of tire and floor material.

#### Foam even adheres to vertical surfaces!

\*Photograph shows stainless steel sheet after spraying.

## **Applications / Instructions for Use**

**Applications** Instructions for Use Cleaning and disinfection of floors, walls, and food processing equipment Use a foam cleaning system to spray the surface/object with a diluted solution, leave for at least 5 minutes, scrub with a brush or scourer and rinse thoroughly with water.

Suggested Amounts

2 to 10%

(See reverse for dilution and washing instructions)

## Ingredients Label, etc.

Acidity/Alkalinity Ingredients

Alkaline agents (potassium hydroxide, sodium hydroxide) Surfactants (alkylamine oxides, quaternary ammonium salts), metal ion sequestrants

Listed dimensions are design values for width  $\times$  depth  $\times$  height. The appearance and labeling of this product may be altered without notice.

#### Foam Cleaning (2 to 10%)

Add product to a foam cleaning system so it produces a 2% to 10% detergent spray.

Leave for a period of time before scrubbing with a brush or scourer.

Use the foam cleaning system to spray the detergent solution onto the surface/object.

Rinse thoroughly with running water.

## Foam cleaning system SaniPlan Foam Sprayer N

(Product code: 901196)

Lightweight, easy to carry, and simple to operate. Generates a fine foam.

#### **Precautions for Use**

- Only use for the applications shown.
- Do not mix with other chemicals or cleaning agents.
- Do not use on products made from aluminum, copper, brass, tin, untreated wood, bamboo, fabrics, etc.
- Avoid using on lacquer ware.
- Avoid using the undiluted product on tile grout (may cause discoloration), varnish, paint, zinc plating, other painted or treated surfaces, or fluororesin coatings that have been damaged by oil or heat (may cause peeling). May cause corrosion depending on the material. First test a diluted solution of the product in an inconspicuous area for potential discoloration before using over a wider area.
- Always read the "Instructions for Use" and "Precautions for Use" printed on the product before use.
